MEMORANDUM FOR THE RECORD

RE: Project []

On November 11, immediately after the meeting of the OCB, I spoke to [] about the above project and drew him a rough chart of what was entailed and the risks and benefits. I told him that we proposed to staff the matter out in detail with General Ridgway and pointed out that it was a matter in which [] was equally interested and was bearing his share of the cost.

After consideration [] said that as far as [] was concerned, he saw no objection to our proceeding with the project.
